

Marlon Esteban Valencia

CHEMICAL ENGINEER AND
FULL STACK DEVELOPER

To whom it may concern,

My name is Marlon Esteban, a Chemical Engineer with experience in analyzing and optimizing industrial processes. My professional focus is centered on problem-solving through the integration of science and technology.

In addition to my engineering background, I work as a freelance web developer, creating modern and efficient solutions using technologies such as React, Node.js, Vue, and .NET Blazor. This dual expertise has allowed me to automate processes and improve systems across both industrial and digital environments. I also possess a solid foundation in electronics and prototype development.

Currently, I am strengthening my skills in cybersecurity and pentesting, with the goal of developing more secure, efficient, and reliable solutions.

I consider myself a responsible, organized, and highly adaptable professional, motivated by new challenges and committed to bringing significant value to your organization.

Thank you for your time and consideration. I look forward to the opportunity to discuss my qualifications further.

Sincerely,

Marlon Esteban
